Noise-Lock® Windows
Architectural high performance acoustic windows

- Certified performance
- Steel construction
- Standard and custom sizes
- In house design, manufacture and installation
- Fire, bullet and angled pane options available
- Over 60 years experience
- ISO 9001 quality registered
IAC Acoustics is a global supplier of high-performance steel acoustic windows with over sixty years of experience in solving issues relating to noise isolation and containment. IAC offers a wide range of standard models, plus the ability to custom design and manufacture windows to suit specific applications.

Thousands of Noise-Lock® acoustic windows have been installed in industrial and commercial buildings throughout the world. Typical applications include hospitals, hotels, schools, offices, broadcasting studios, nightclubs, museums, test cells, laboratories, plant rooms, and power stations — in fact virtually any situation where sound must be contained within or excluded whilst still maintaining visibility.

Engineered Advantages
IAC Acoustics produces an engineered system — custom-designed in-house to suit the required opening of any given project. Utilising precision laser cutting and state-of-the-art fabrication, all Noise-Lock® windows are simple to assemble on site by our network of highly experienced installation crews.

Noise-Lock® windows are laboratory-tested for performance in both IAC’s own R&D facilities and independent laboratories, further supported by installed site testing and engineering calculations for custom specifications. IAC Acoustics is renowned for quality, durability and guarantees in-field performance.

Performance and Flexibility
IAC Acoustics offers a comprehensive range of products designed for architectural, industrial and security applications. IAC Acoustics’ Noise-Lock® windows feature:
- Performance ratings from STC-44/Rw47 to more than STC-62/Rw66
- Design flexibility with all windows available in standard and custom sizes or designs
- Supported with laboratory test data
- High-performance windows for both architectural and industrial applications
- UL, BS and EN fire ratings available
- Bullet resistant glass options available
- Industry leading fabrication times and quick-ship programs

Design Features
IAC Acoustics Noise-Lock® windows are available with a number of standard and custom design options. Please consult IAC Acoustics for availability of both standard and bespoke features such as angled panes, bullet resistant glass and EN 1634-1 [EI] fire rated frames in various specifications. All IAC Noise-Lock® windows are built to order and site assembled using laminated glass as standard.

Complementary Products
In addition to windows, IAC Acoustics offers a range of other components that integrate seamlessly to form larger and more complex noise control systems. These products include Moduline™, IAC’s modular acoustic construction panel system, Noise-Lock® acoustic doors, TrackWall™, a moveable partition system and VisionWall™, a range of large-sized acoustic exterior windows.
For a list of IAC locations worldwide please refer to our website.
